

Information Security Policy Statement

E P Industries' senior management team recognise the importance of developing and implementing an Information Security Management System (ISMS) to protect business information assets from security threats, whether internal or external, deliberate, or accidental. Demonstrating successful implementation of this ISMS will assure all interested parties of the high regard we have for their intellectual property.

To achieve this, we have set an objective of ensuring that information is only accessible to authorised persons from within or outside the company. This will minimise the potential damage by preventing and reducing the impact of an information security incident.

Confidentiality, Integrity, and Availability of information will be maintained throughout all business functions and processes.

To meet this objective, we will identify and control business information security. This methodology will meet legal, regulatory, and contractual requirements.

To protect business information assets from security threats, roles and responsibilities have been assigned. The Office Manager will lead as the information security and data protection officer. The IT support (Premier System Solutions) is responsible for the technical maintenance of security devices and technologies that protect the networks and resources and the ISMS's overall integrity.

The ISMS policy will be communicated to all interested parties so that the importance of information security becomes part of the business culture and ensures the continued protection of the company's assets.

All breaches of information security, whether actual or suspected, must be reported to the Office Manager, who will instigate the appropriate level of investigation.

This ISMS Policy Statement is authorised by:

EDDIE PILSWORTH
